

INCOME INEQUALITY IN ARKANSAS NEEDS A

TUNE-UP

THE TOP FIVE PERCENT OF ARKANSAS EARNERS MAKE TEN TIMES AS MUCH AS THE BOTTOM 20 PERCENT OF HOUSEHOLDS.

Income inequality affects all Arkansans. Low- and middle-income consumers make up most of the population. Rising inequality means too few Arkansas families are able to contribute to our economy.

THE ROAD TO HIGHER INCOME OFTEN DEAD ENDS.

Moving up, earning more, and providing for our families – it's part of the American dream! Sadly only **ONE IN FOUR** below average earners in Arkansas make a significant jump in income after ten years of hard work.

WE CAN FIX IT!

JUMP START upward mobility by investing in early education. We also need to make sure tax cuts help low-income families first.

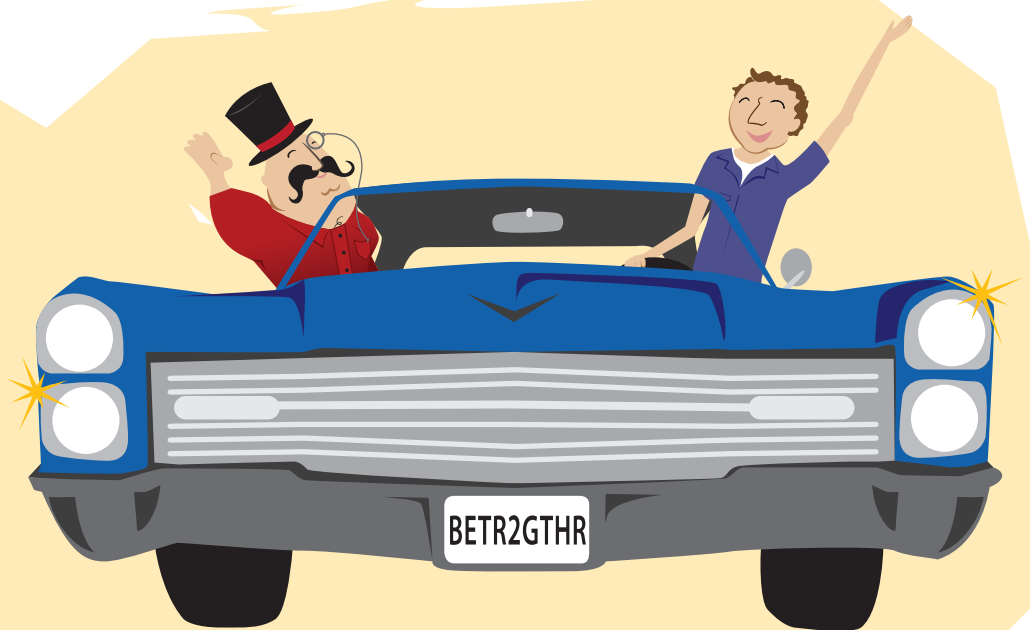

REFUEL the economy and implement a state-level earned income tax credit so no working family in Arkansas lives in poverty.

FIX our broken tax system so that everyone pays their fair share. Right now, low-income earners pay twice as much of their income in taxes as the super wealthy.

MAKE SURE we have protections for Arkansans who lose their jobs when times are tough.

OPPORTUNITY FOR ALL ARKANSANS TO GET AHEAD MEANS A SMOOTH RIDE TO A BETTER FUTURE!
